INSPECTOR SUMMARY

<b>COMPANY:</b>		<b>LOCATION / UNIT:</b>	Bayou Corne
<b>DATE:</b>	July 17, 2012	<b>INSPECTOR:</b>	Paul M. Arabie

REGULATION	COMMENT
	Reported at 8:00 am to John Boudreaux with Assumption Parish OEP. One agent with DEQ was also present today.
	Three boat rides were taken (one approx. 9:00 am, one at approx. 12:00pm and again at approx. 4:00pm) to monitor bubbles in Bayou Corne area. During the 9:00am and 4:00pm rides, DEQ personnel used portable gas detectors to check for gas presence in the atmosphere at the bubble sites. The gas concentration at these sites was not significant enough to register on gas detection equipment during either of the three boat rides. During the 12:00pm boat ride, members of the National Guard hazardous materials response team were present. The National Guard representatives captured gas samples from three of the bubble sites for further testing.
